

We enable Children's Clinics to bring comprehensive care to kids and teens in our Square & Compass Building on the Tucson Medical Center campus.

Square & Compass also spends thousands of dollars annually on medical services, hospitalization, supplies and equipment for children whose families do not have other resources.

Square & Compass does not provide medical care. Rather, our philanthropic support enables Children's Clinics to deliver care from the community's best physicians and healthcare practitioners who provide multi-disciplinary care in more than 45 specialties.

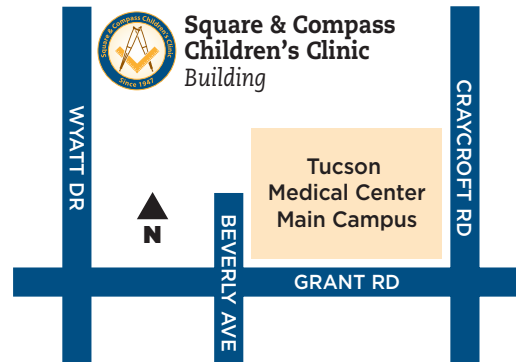

**The pediatric medical and surgical clinics that we support and Children's Clinics deliver include:**

- |                                    |                           |
|------------------------------------|---------------------------|
| Audiology                          | Occupational Therapy      |
| Baclophen Pump                     | Ophthalmology             |
| Behavioral Health                  | Optometry                 |
| Cardiology                         | Oral-Maxillary            |
| Cerebral Palsy                     | Orthodontia               |
| Dental                             | Orthopedics               |
| Dermatology                        | Osteogenesis Imperfecta   |

**Square & Compass Children's Clinic**

*We help children every day*

*As the philanthropic partner of Children's Clinics in our Square & Compass Building, our financial support enables Children's Clinics to deliver comprehensive, multi-disciplinary medical care for Southern Arizona children with complex medical conditions and their families.*

# Helping Us Help Children

Square & Compass Children's Clinic is a non-profit, tax-exempt organization governed by a volunteer board of directors. We exist to fund and support the unified, multi-level outpatient pediatric services of Children's Clinics.

We do not provide medical or health care services, but financially support the singular work of Children's Clinics. We have been able to reach our goals and help Southern Arizona's children through voluntary contributions from individuals, organizations, and businesses, and through memorials and bequests.

- The Blue Lodge Masons, their spouses and widows have built a solid base of support on which we rely, philosophically and financially. Their contributions are our cornerstone.
- We appreciate legal professionals who have recommended bequests and memorial gifts toward our program.

Along with Tucson Medical Center, Banner University Medical Center, the State of Arizona, and various other community partners, as well as individual donors, volunteers, and physicians, we are able to help fulfill the complex and unique healthcare needs of children in Southern Arizona.

We appreciate your interest and support. Your tax-deductible gift would forward our mission of helping kids with special health needs and their families have a better life.

## Eligibility for Our Help

Children's Clinics serves Southern Arizona children, including the siblings of children with special health needs and those seeking primary care.

In addition to providing the building for Children's Clinics and funding some equipment purchases and operational costs, we assist uninsured or under-insured children with disabilities or complex medical conditions.

**Here's how it works:** A child is seen at Children's Clinics. If the child's family does not have adequate resources, we help fund the care and services they need, such as providing customized wheelchairs, non-generic prescriptions, specialized therapy equipment and hearing aids.

The medical conditions treated at the Children's Clinics, which make children eligible for our financial assistance for treatment of congenital and acquired disorders include, but are not limited to:

- Club Feet
  - Epilepsy
  - Cerebral Palsy
  - Scoliosis
  - Burn scars or other scars
  - Certain eye and ear disorders
  - Dislocated hips
  - Leukemia
  - Cystic Fibrosis
  - Cleft lips and palates
  - Myoneural disorders and neuropathies
  - Tumors and other neoplastic diseases
  - Malunited fractures
  - Heart conditions due to congenital malformations
- Spina Bifida

**Many of Children's Clinics' patients qualify for State of Arizona's Children's Rehabilitative Services (CRS). Others are covered by some insurance plans, Arizona's AHCCCS plan and KidsCare. For an applicant to be eligible for our assistance, he or she must:**

1. Be under 21 years old;
2. Have an eligible medical condition and acceptable prognosis;
3. Be unable to afford private care and meet other financial eligibility criteria; and
4. Submit a properly completed application form

Square & Compass Building

## Our History of Helping Children

1947

Square & Compass founded a pediatric polio clinic, which operated out of the backyard building at Ted and Daisy Walker's home.

1950

The first patient was seen at the facility on Broadway, which housed the Square & Compass Crippled Children's Clinic, and served disabled and chronically ill children through the State of Arizona Crippled Children's Services.

1991

We moved to the current location on Wyatt Drive on the Tucson Medical Center Campus and began our partnership with Children's Clinics.

2010

Children's Clinics in the Square & Compass Building completes our major renovation, with new equipment and additions for the clinical suites installed to provide optimal care for cardiac, neurology and pediatric surgery patients. Aesthetic and activity additions enhance the compassionate, caring, family centric facility.
